

Inscriptions

The inscription can be very difficult to decide upon and it is imperative to give this plenty of thought. Try writing it out a number of times and starting again. Give us your jottings and see if we can put it together in a more cohesive manner. At this early stage you must give consideration to the long-term future of the memorial - will the grave be used again for other members of the family and therefore space required for further inscription.

We will always give clients a scale proof of the inscription to consider before the final decision is made.

You may like to consider the style of the letter - upper/lower case, font type and size, or you may leave this to us to make a suggestion.

The cost of the inscription will be based upon the number of letters. Please contact us for a quote.
